

GET TO WORK

VERIFY DATA SOURCES

Once you've identified what asset data points you need, this worksheet will help determine where that information comes from. If the info you need is currently on paper, decide if your team is going to tackle the data entry yourselves or if you're going to outsource it. On the same note, if you've identified crucial new data points, figure out if in-house data collection is your best option or if outsourcing makes more sense.
